Young Persons Status

NB: Please note there may be some differences in young peoples destinations when comparing historical data against previous years reports. This is due to our national client caseload information system continuously being updated with information. For example when the 2024 version of this report was published we may not have known a young persons destination but have since been able to establish the young person's situation.

National and Statistical Neighbour data comes from Local Authority tables published by the DfE on a monthly basis.
